August 2024

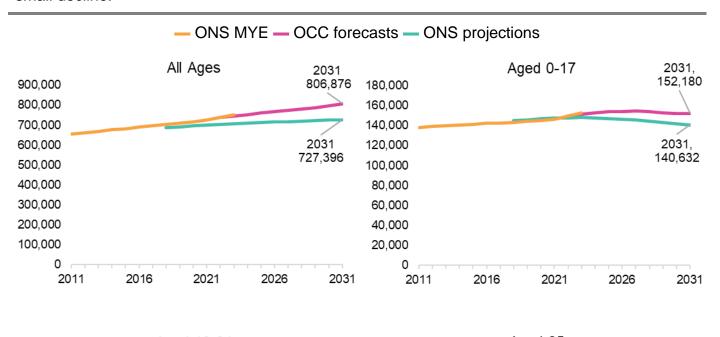

Release of 2022 to 2031 housing-led population forecasts for Oxfordshire, districts and MSOAs

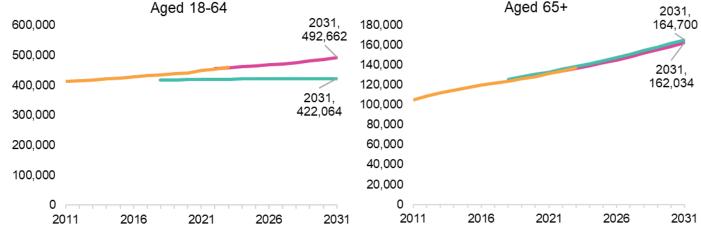

This bitesize presents the Oxfordshire County Council (OCC) housing-led population forecasts released August 2024. It compares the latest OCC forecasts with Office for National Statistics (ONS) Mid-year estimates (MYE) and 2018-based population projections, which does not include any Census 2021 information.

Important note: housebuilding is a model input, and outputs reflect the expected population if that housebuilding occurs. The forecasts therefore do not indicate housing need, and should not be interpreted as such.

The August 2024 update of the Oxfordshire County Council housing-led forecasts predict a total population in Oxfordshire of 806,900 by 2031, a growth of 68,600 (+9%). Over the same period the ONS projections show an increase of +3% but the ONS MYE between 2013 to 2022 saw a +10% increase. The forecast population is lower than last year's update in large part due to new housing being delayed by a year but also updates to birth and migration rate assumptions.

Differences are particularly apparent for the younger and working age groups. For older people aged 65 and over, the predicted growth is similar. Under 18s peak in 2027 and then have a small decline.
