 There were 3,500 people aged 85+ in the Cherwell district. This is projected to increase by 89% by 2037

Historical population change 2007 to 2017

Health Summary for Cherwell District

 The Public Health England local health profile for Cherwell shows that, for the majority of indicators, Cherwell is better than or similar to the national average

 Indicators that are worse than average are killed and seriously injured on roads and estimated diabetes diagnosis rate

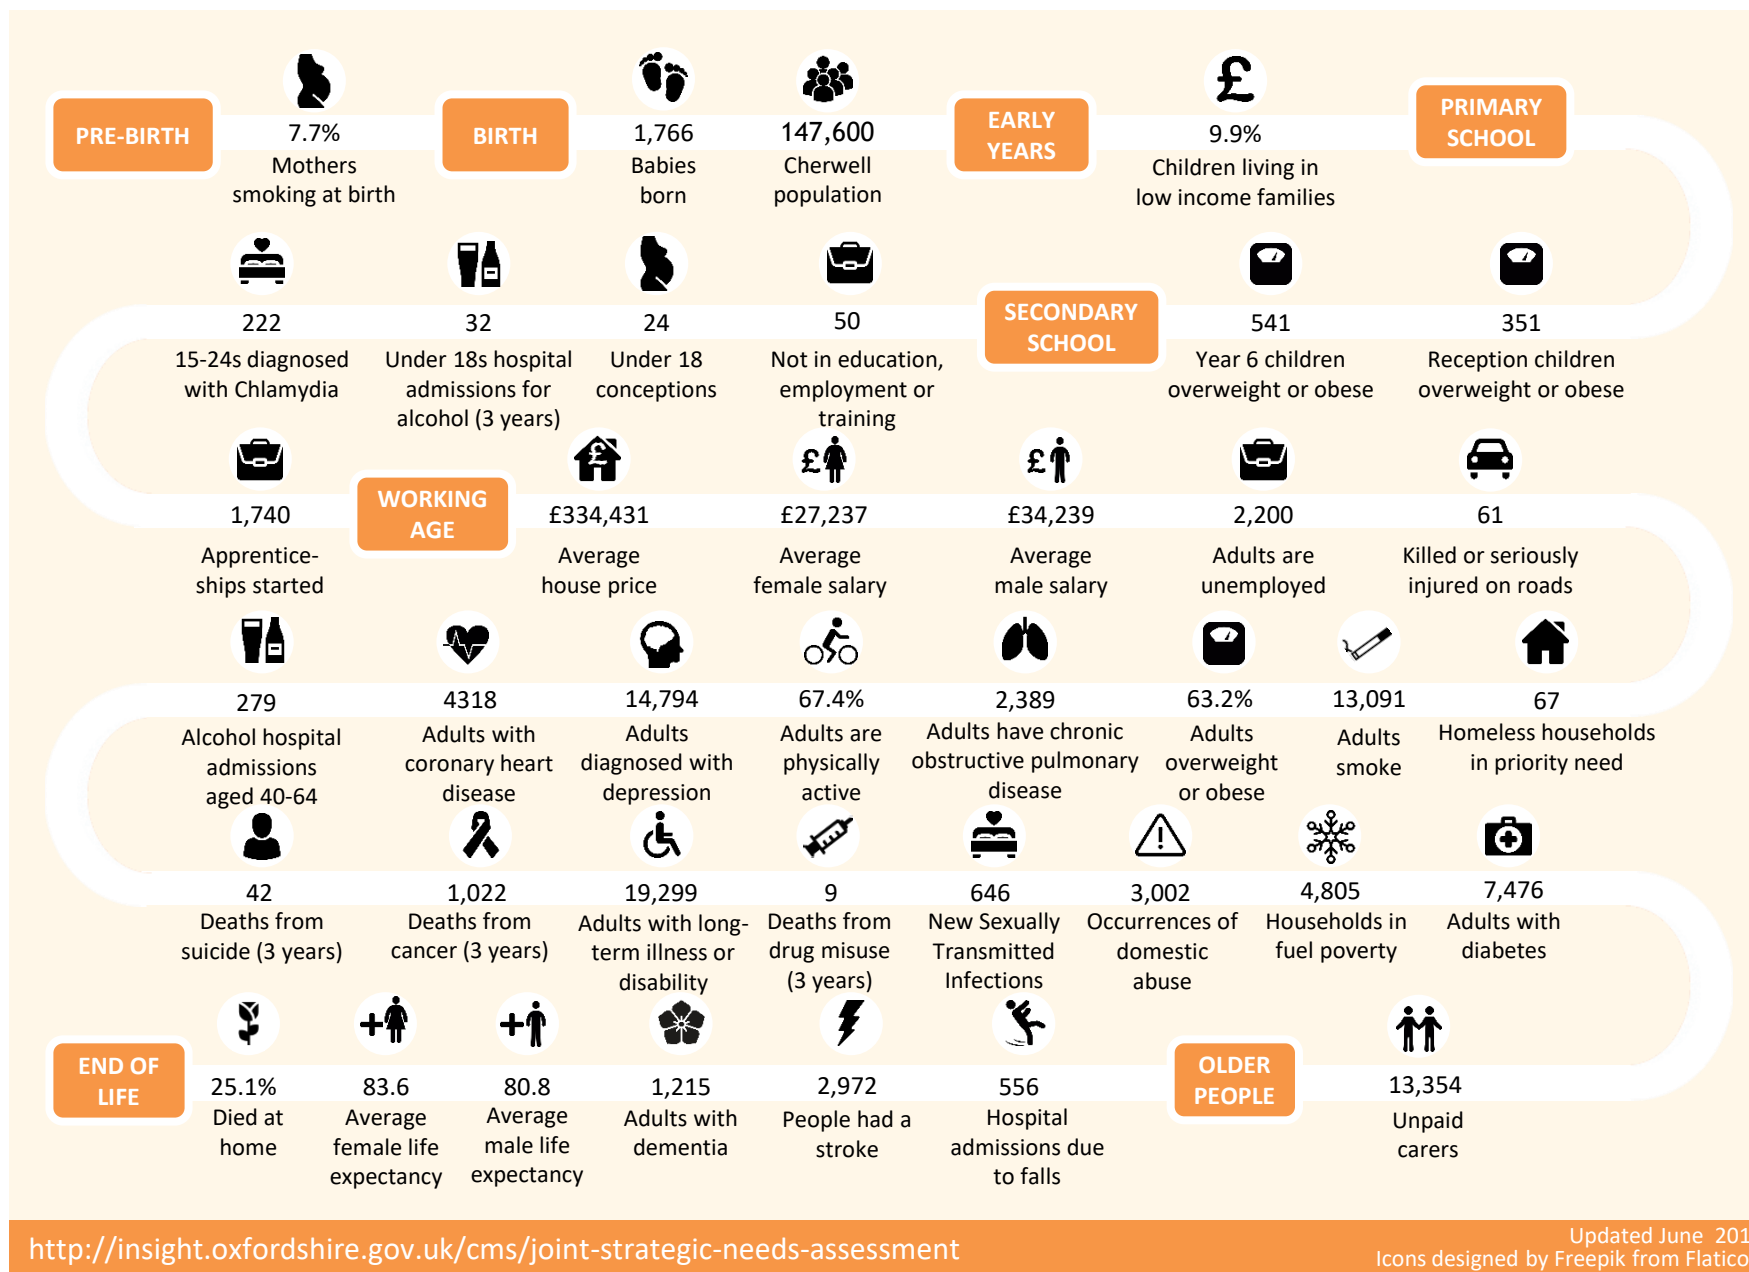

The chart below shows how the health of people in this area compares with the rest of England. This area's value for each indicator is shown as a circle. The England average is shown by the red line, which is always at the centre of the chart. The range of results for all local areas in England is shown as a grey bar. A red circle means that this area is significantly worse than England for that indicator. However, a green circle may still indicate an important public health problem.

- Significantly worse than England average
- Not significantly different from England average
- Significantly better than England average
- Not compared

	Indicator names	Period	Local count	Local value	Eng value	Eng worst		Eng best

	32 New cases of tuberculosis	2014 - 16	43	9.9	10.9	69.0		0.0

Cherwell District 2019 health and wellbeing facts and figures 2019

Cherwell inequalities summary

In Cherwell, wards with the most indicators worse than Oxfordshire or England are in Banbury. Banbury Ruscote ward has no indicators significantly better than Oxfordshire or England

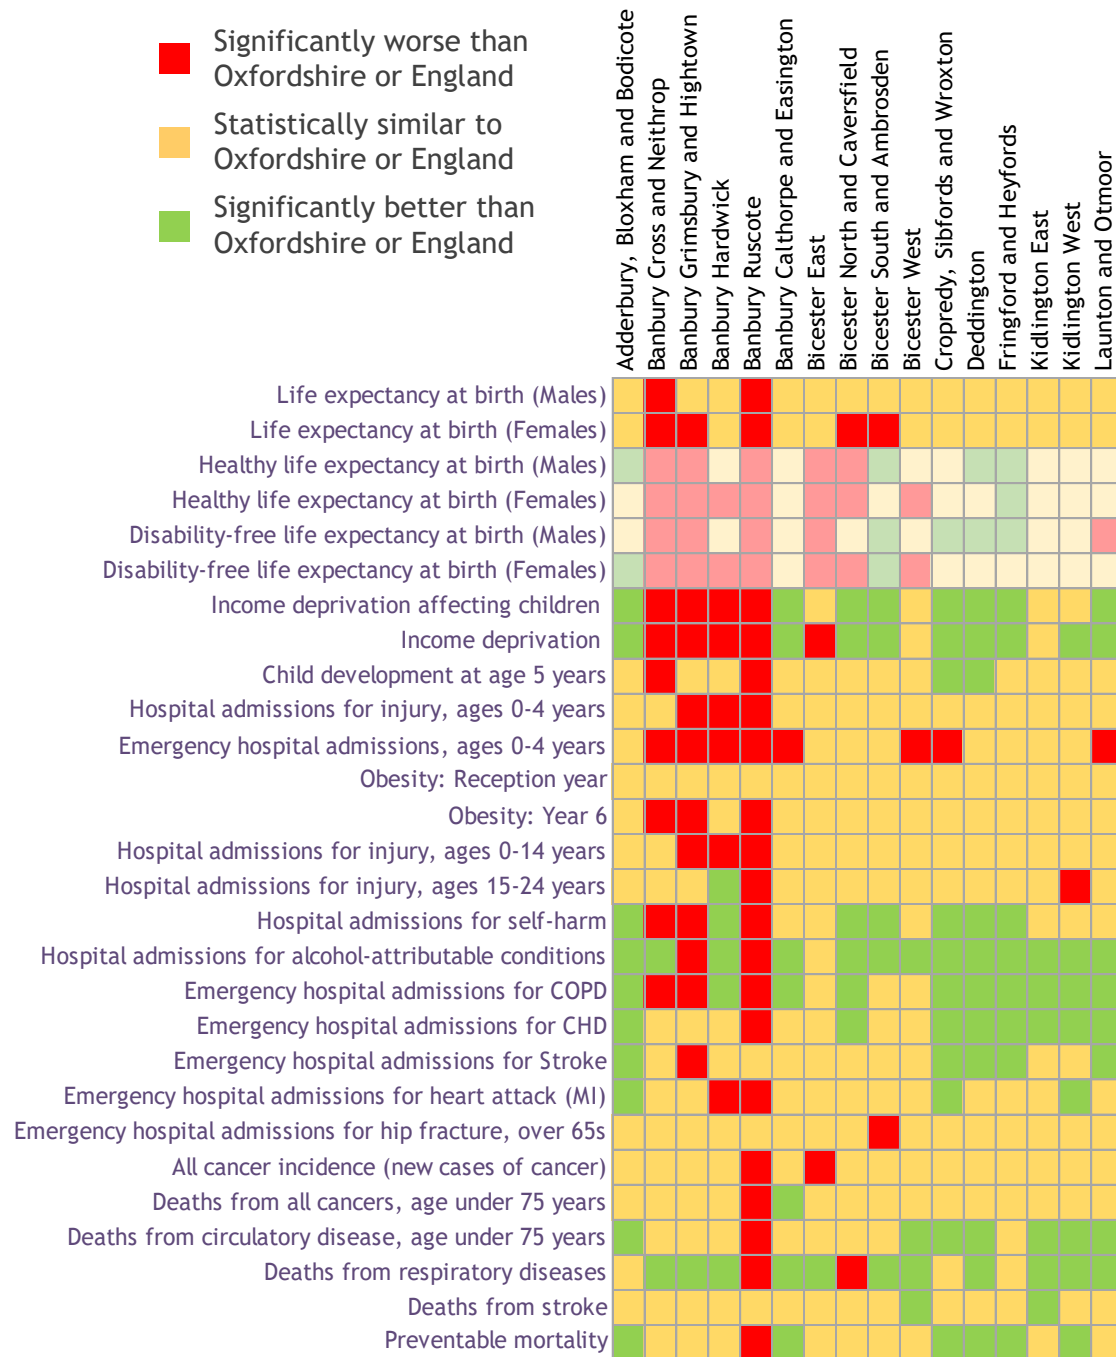

Four of the sixteen Cherwell wards have no indicators worse than average: Adderbury, Bloxham & Bodicote; Deddington; Fringford & Heyfords; and Kidlington East

The indicators with the most wards worse than average are health state life expectancies and emergency hospital admissions in children aged 0-4 years

Data are shown at ward level for ward boundaries in place in 2016. Health state life expectancy indicators use ward boundaries in place prior to 2016 which may be different from current boundaries and cause discrepancies in the tartan rug. These indicators are shown in a paler colour scheme.

For more information, see the [Inequalities Indicators Excel Pack](#)

- Significantly worse than Oxfordshire or England
- Statistically similar to Oxfordshire or England
- Significantly better than Oxfordshire or England
