

Your questions for ONS

Great to find out about your team, as a council we are doubling down on outcome data - it would be great to know what data sets will become available on a district level e.g community life survey

Will there be a Census 2031?

Could you please clarify how students were counted in the Census?

We've started mapping deprivation in power BI, what mapping tools do you use in these reports?

Is there a 2021 census version of the IMD on the way?

Can you drill down into ethnicity? when building profiles

Citizen Advice have some great data about what happening across Oxfordshire - from their client interactions, it would be great to hear from them

Census data - so what? Notes from your breakout rooms

Being able to access at a district and even a parish level is very useful.

Been looking at ethnicity and employment

Looking at deprivation, age, ethnicity data to model/plan for health care commissioning, car charging points

being able to drill down on more local data. looks like a really useful tool

Analysis of population groups and health eg ethnicity, carers, gender, children

Using ethnicity and age data to make sure we are hearing from a representative set of people

Been cross referencing census with data in our systems eg social care carers

Use of deprivation, employment and age indicators to inform key areas.

Census data - so what? Notes from your breakout rooms

Really important for
ethnicity population data

Use to support
community focus

Comparing 2011 vs 2021
data

physical activity

ethnic groups beyond
census level e.g. Timor
Leste community

Ideas for future analyst networking meetings
